

DAVIS AIRTECH

The **Right** Choice

- E85 stations are on the rise and the EPA has approved the use of E15.
- Over 60% of the vehicles on the road today can use E15, and there are more than nine million Flex Fuel Vehicles in the US.
- Government mandates require annual consumption of 36 billion gallons of ethanol by 2022.
- The majority of ethanol/gasoline meters are approved only up to E10 blends.

Is your company ready to meet the demands of dispensing high ethanol blend fuels?

Davis Airtech introduces our new line of NTEP certified, remanufactured Flex Fuel meters for high ethanol blend fuels. Backed by the quality and service you have come to expect from Davis Airtech, these meters are built and calibrated to the exacting standards of Handbook 44. The NP Series meters provide your customers the most cost effective solution to convert their existing Gilbarco® and Wayne® pumps to dispense Flex Fuels.
